City of Redmond, Downtown Circulation Options

Redmond Way/NE 76th Couplet and Bear Creek Parkway Bypass

Changes from existing

NE 76th Street becomes one-way with improved connections . Redmond Way reduced to two through lanes. Bear Creek Parkway increased to four lanes with improved connections east and west.

10

Opportunities

Potential for "Main Street" Environment on Cleveland Street

Flexibility of two-way access on Cleveland Street

More clearly defined couplet (fewer curves, clearer connections on ends)

Potential for eastern "Gateway" roundabout.

Potential for traffic calming on Cleveland Way

Does not take additional width in BNSF right of way

Challenges

Requires new connections east and west

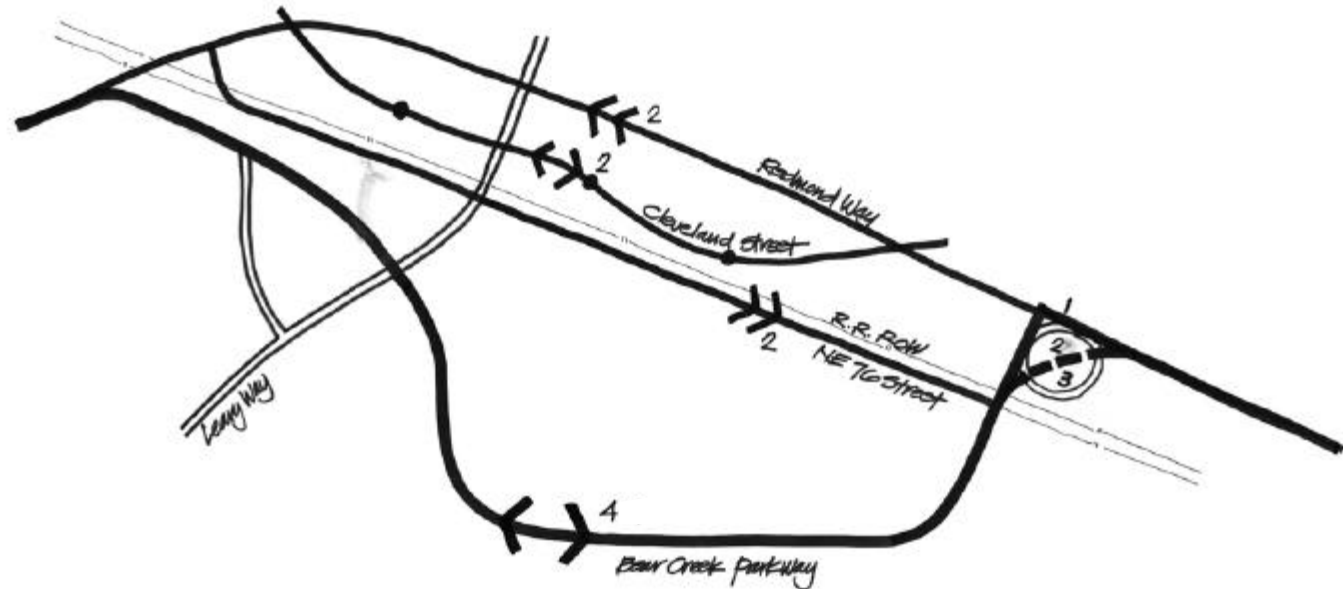

Requires connection to Bear Creek Parkway near Heron Rookery

Local circulation on 159 Place NE

Property Acquisition

Traffic control related to high capacity on Bear Creek Parkway

Description: Moderate volume couplet formed with Redmond Way and NE 76th Street. Bypass along Bear Creek Parkway.
